**“Reflection, Refraction & Excitation: The Hunt For Atmospheric
Optical Effects”**

Double Green Flash

Mary has been passionate about hunting for atmospheric optics for many years. In this talk she will show us lots of the common things seen from the UK plus some not so common ones.

Mary says: “I’m a science geek who loves all things related to astronomy and astrophotography. I am passionate about outreach and regularly give astronomy and astrophotography talks to ... astronomy societies.”
